DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2 and 4-5, drawn to a two-dimensional wavelet transform, classified in class 375, subclass 240.19.
- II. Claim 3, drawn to computing an objective score for objective measurement of video quality, classified in class 375, subclass 240.26.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the weighting means can use a variety of methods to calculate a video quality indicator or objective score. The subcombination has separate utility such as calculating an objective score to indicate video quality not in the wavelet transform domain.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
